24 inch

SHELF EDGE DISPLAY

BV-UW24S-D

Unlike the resize/ cut panels, Betvis stretched display uses native bar type displays that features a photo mask manufacturing process which ensures high quality and outstanding industrial-grade performance. The reliable commercial grade screens enable your shelf display to run smoothly 24/7.

Elevated brightness of 300nits provides extraordinary color expression and greater visibility. In addition, the Full Viewing Angle allows Native Stretched panels to display consistent, accurate color from all viewing angles.

Native Stretched display can completely avoid the flaws coming from resize/ cut panels, like broken glass, fragile sealing, micro-cracks and light leakage and so on.
